Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a method of data authentication, classified in class 713, subclass 161.

II. Claims 10-12, drawn to a method of obtaining tamper resistant files, classified in class 713, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as checking the authenticity of a homepage without using CGI as in invention II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above, would require different searches, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
